

COMPACT GLUE INSPECTION CAMERA SYSTEM FOR FOLDER-GLUER MACHINES

ERO-MSc glue inspection system provides real-time images of the folding cartons on the production line detecting any defects and displays pictures of the faulty boxes for an in-depth defect analysis.

The system features a GTE-13/S glue applicator and an extra slim black & white camera. Both can be monitored from a control screen, that shows pictures in real time.

The system comes standard with support, iluminator, photo-eye and cables.

Extra high-speed inspection
Reports in real time
Reliable and easy handling
Smart design
Compact size

Specifications:

- Resolution: 640X480 pixels
- Frame rate: 160 frame/sec.
- Maximum speed: 550 m/min.

GTE-13/S glue distributor can work at speeds of up to 1000 cycle/sec. providing precise application with perfect cut-off.

Fitted with ceramic stem spheres and nozzles, the applicator inhibits glue blockage and reduces maintenance.

TOUCH SCREEN, I-PAD OR I-PAD PRO

MSC inspection camera is monitored and driven by a proprietary touch screen or an iPad.

A data analyser, an encoder frequency divisor and a stroboscopic illuminator are installed inside an electrical cabin.

ACCESORIES

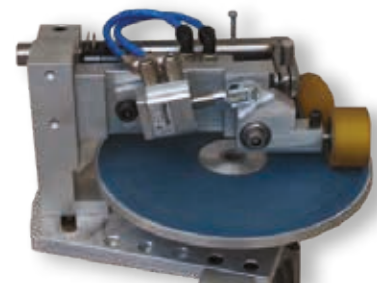

An extractor, kicker and marker for defective boxes are available as optional complementS. Both touch screen and iPad come standard with the software to drive the devices. When the predefined limit of faulty boxes has been registered, the system automatically shuts down the feeder.

Marking Valve and Tank

Kicker

Extractor
